

Göteborgs Förenade Sociala Arbetskooperativ

GFSAK is a resource organisation for work-integrated social enterprises in Gothenburg.

We support our members and provide advice and support in business development, leadership, skills development, employer responsibility and finance. We ensure that both companies and people in our organisation have the opportunity to grow and develop at their own pace.

We act as a voice and advocate for work-integrated social enterprises and their ability to provide for people, who are far from the labour market, with a job and the opportunity to be in control of their own lives and participate in society.

We actively search and apply for public procurements and projects that favour the growth of our businesses.

We are an economic association, politically independent and we believe in the power of entrepreneurship to create work and employment for people who are far from the labour market.

We believe in a socially sustainable society that can contribute to diversity, tolerance and equality.

We reinvest all profits in our businesses, allowing us to start up new businesses, expand existing businesses and thus employ more people who are far from the labour market.

We are a resource organisation that creates possibilities for people with functional variations and experience of exclusion from society to earn their own livelihood, to feel needed, to contribute to society and to grow as individuals!
